

Cost and Coverage Questions to Ask

Having the right information can help you access your prescribed Pfizer migraine medication. After your healthcare provider prescribes a Pfizer migraine medication, you can use this resource to help you discuss important topics like your health insurance coverage and paying for your medication.

Questions to consider asking your healthcare provider's office

- 1 What is the most recent prescription drug insurance information you have on file for me?
- 2 Are there extra steps, or a prior authorization (PA), required by my insurance plan?
- 3 (If you have commercial/private insurance) Where can I sign up for a copay savings program?

After your healthcare provider sends a PA request:

- 4 Do you need any additional information from me about my medical history for the PA request?
- 5 Can you confirm that the PA was submitted?
- 6 How long will the PA process take?

Questions to consider asking your insurance plan

- 1 What are your requirements to get approval for this medication?
- 2 How is my medication covered on my plan?

If the PA was not approved:

- 3 Can you explain why my request was denied?
- 4 Can you send me a copy of the denial letter?
- 5 Is the reason for denial something that my healthcare provider can fix, such as an error in completing the request?

Notes

Reach out to a Pfizer Migraine Patient Access Coordinator:

- Call **1-866-222-4183**, Monday-Friday, 8 AM-8 PM ET
